

Powerful Cost Effective and Green

Advanced G-Force cleaners harness the magic of natural microbial cleaning action

GreenLogic
LIMITED

G-FORCE Microbiological Cleaner (Concentrate)

GreenLogic's **G-Force Microbiological Cleaner** is a concentrated probiotic odour control cleaner that is as tough on odours as it is friendly to the environment. Can be used full strength or diluted 1:2 with water.

The bad odours common in washrooms, kitchens, hospitals, etc. are caused by the decomposition of organic materials by bacteria. **G-Force Microbiological Cleaner** overpowers the "bad" odour-causing bacteria by introducing "good" odour-free bacteria to digest the organic materials naturally. G-Force is safe for carpets and upholstery as well as hard surfaces, enabling you to keep your entire indoor environment safe and smelling fresh without the use of harsh and destructive chemicals.

G-FORCE Turbo

GreenLogic's **G-Force Turbo Drain Blaster** uses the power of nature to break down the organic waste that builds up on surfaces and in drains.

G-Force Turbo Drain Blaster uses a potent combination of natural enzymes and "friendly" bacteria to break down organic waste such as fat, grease, oil, food particles and debris. It is a high performance, biodegradable cleaner that is tough on waste and easy on the earth. Use **G-Force Turbo Drain Blaster** as an alternative to more costly drain opening procedures.
